Mr. John Dickerman
Service Manager
MATTEL ELECTRONICS
5150 Rosecrans Avenue
Hawthorne, CA 90250

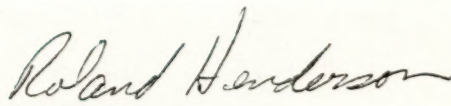

Dear John,

Per our phone conversation 4-9 subject Intellivision Master
Component Instruction Manual 2609-0920.

Please review and add in the manual on Page 5, HOW TO USE THE
MASTER COMPONENT, step 3.

3. Adjust the television sets VHF fine tuning control to
the best picture and sound. If your television set
has automatic fine tuning you should operate your set
with the automatic fine tune on. Adjust the volume,
picture and color controls on your television to a
pleasing level.

The reason for this is, the fine tuning on the set is a very
important item. If channel 3 or 4 is not received locally, the
fine tuning may be way off from the correct tuning frequency.
Secondly, if the set has automatic fine tuning then operating
with it on will provide better tuning during warm up of both
the TV and the intellivision master component.
